¹Map the Meal Gap's child food insecurity rates are determined using data from the 2009 Current Population Survey on children under 18 years old in food insecure households; data from the 2009 American Community Survey on median family incomes for households with children, child poverty rates, and race and ethnic demographics among children; and 2009 data from the Bureau of Labor Statistics on unemployment rates. Because congressional district estimates use a three-year average of unemployment data (2007-2009) and county-level estimates use unemployment data from one-year (2009), congressional district estimates are not directly comparable with county estimates.

²Numbers reflect percentage of food insecure children living in households with incomes above or below 185% of the federal poverty guideline for 2009. Eligibility for federal child nutrition programs is determined in part by income thresholds which can vary by state.
