Gundersen, C., Waxman, E., Engelhard, E., Satoh, A., & Chawla, N. Map the Meal Gap 2013: Food Insecurity Estimates at the County Level. Feeding America, 2013. This research is generously supported by the Howard G. Buffett Foundation and The Nielsen Company.

¹Map the Meal Gap's food insecurity rates are determined using data from the 2001-2011 Current Population Survey on individuals in food insecure households; data from the 2011 American Community Survey on median household incomes, poverty rates, home ownership, and race and ethnic demographics; and 2011 data from the Bureau of Labor Statistics on unemployment rates.

County	Population	Food insecurity rate ²	Estimated number food insecure individuals (rounded)	Income within the food insecure population ³		
				% below SNAP threshold of 130% poverty	% between 130% and 185% poverty	% above Nutrition Pgm threshold of 185% poverty

²The statistical model for estimating food insecurity in 2013 differs slightly from the model used in 2012. The updated 2013 model includes "homeownership" in addition to the variables used in previous years to account for household assets and help produce more accurate estimates of food insecurity at the local level. For more information about these factors, please see the technical brief or supplemental methodology information on HungerNet.

³Numbers reflect percentage of food insecure individuals living in households with incomes within the income bands indicated. Eligibility for federal nutrition programs is determined in part by these income thresholds which can vary by state.

⁴Population and food insecurity data in the state totals row do not reflect the sum of all counties in that state. The state totals are aggregated from the congressional districts data in that state. All data in the state totals row pertaining to the cost of food or the "Meal Gap" reflect state-level data and are not aggregations of either counties or congressional districts.
