This research is generously supported by the ConAgra Foods Foundation and is based on Map the Meal Gap: Food Insecurity Estimates at the County Level, supported by the Howard G. Buffett Foundation and The Nielsen Company.

¹Map the Meal Gap's child food insecurity rates are determined using data from the 2010 Current Population Survey on children under 18 years old in food insecure households; data from the 2010 American Community Survey on median family incomes for households with children, child poverty rates, and race and ethnic demographics among children; and 2010 data from the Bureau of Labor Statistics on unemployment rates.

²Numbers reflect percentage of food insecure children living in households with incomes above or below 185% of the federal poverty guideline for 2010. Eligibility for federal child nutrition programs is determined in part by income thresholds which can vary by state.
