¹Map the Meal Gap's food insecurity rates are determined using data from the 2001-2012 Current Population Survey on individuals in food insecure households; data from the 2012 American Community Survey on median household incomes, poverty rates, homeownership, and race and ethnic demographics; and 2012 data from the Bureau of Labor Statistics on unemployment rates.

²Numbers reflect percentage of food insecure individuals living in households with incomes within the income bands indicated. Eligibility for federal nutrition programs is determined in part by these income thresholds which can vary by state.
