

Feeding America's Carbon Credit Financing Program for Food Rescue

Feeding America is excited to share a game-changing opportunity to innovate in carbon offset financing—one that, paired with traditional philanthropy, will positively impact the planet, expand food rescue and support our mission to end hunger.

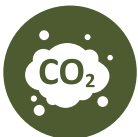

Doris, South Dakota

Feeding America, the nation's **largest hunger relief and food rescue organization**, unites 200+ food banks, regional cooperatives, state associations and 60,000+ agency partners to rescue more than **4 billion pounds** of food each year.

The Feeding America network turns **excess into access** by rescuing food from **manufacturers, grocers and farmers** BEFORE it becomes food waste.

Our collective work provides nutritious meals to communities across the U.S. and avoids more than **1 million metric tons** of CO₂ emissions.

Feeding America is participating in a new market for carbon credit financing. Carbon financing will help the network **continue to invest in capacity and capabilities** to rescue even more food.

Thank you for partnering with us on a fresh solution that will help more food reach neighbors facing hunger. Together we have the power to make a real impact!

We're here to answer questions. Reach out to foodrescue@feedingamerica.org to learn more.
